

I am shocked that Sinclair Broadcasting is attempting to force their stations to air an anti-Kerry documentary before our public election in November. I believe it is the FCC's job to protect us from such dangerous misuse of our public airwaves! Media consolidation has been rising and now we have just the type of crisis that I feared.

Sinclair does not own our public airwaves, the public does. This democracy depends on the FCC protecting us from such misuse, as individuals we can do nothing except demand our public institutions use their power to protect us. Please, please intervene to stop large companies from running attack documentaries.

I consider this election as very important as people are dying in a war. The fact that a corporation would put their own interests over the natural democratic process is shocking and, I hope, illegal. Please stop it! Thank you on behalf of the public that you are created to serve.
